

Contribution to Entropy From a Single Site:

This site contributes on average

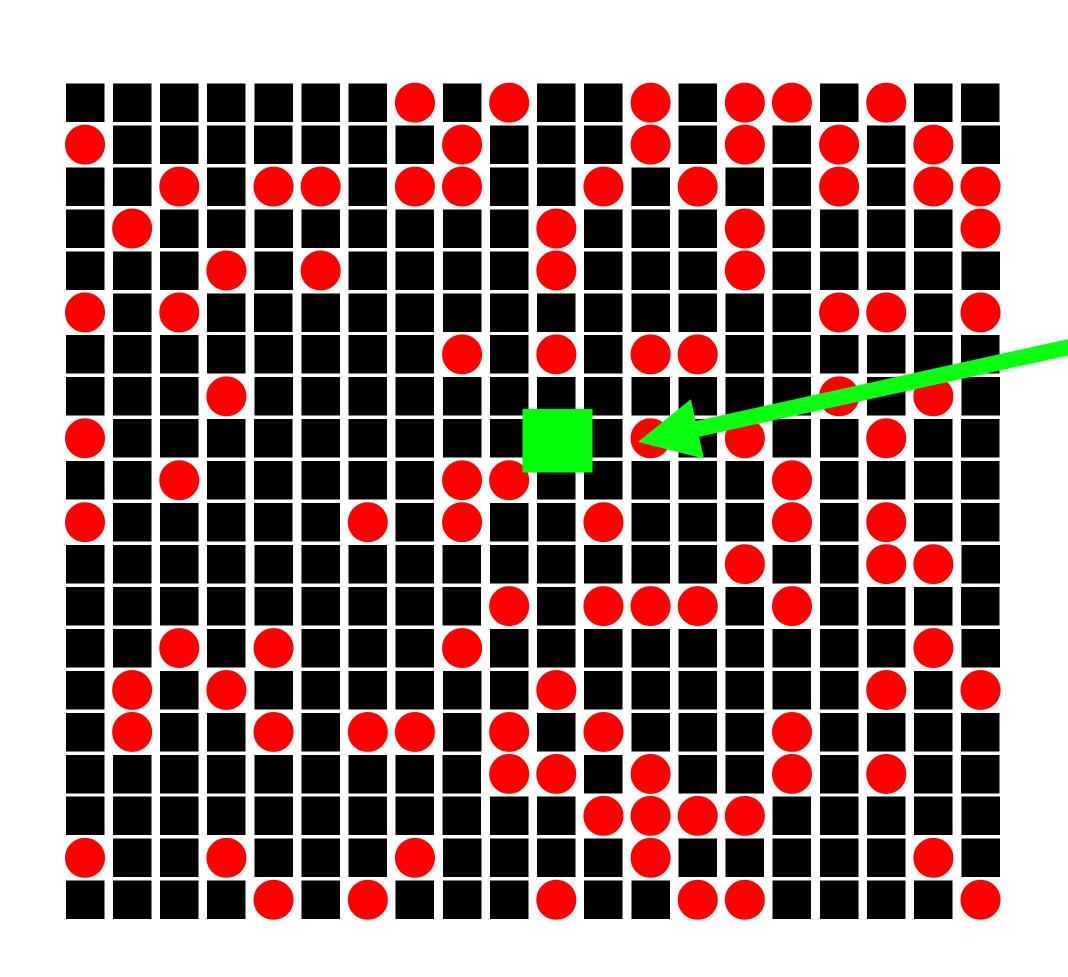

$$S_1 = -k\langle \ln P_i \rangle = -k \sum_i P_i \ln P_i$$

 $S = NS_1$

to the total entropy:

Pick a site: the other sites form the reservoir at temperature T

Contribution to Entropy From a Single Site:

Pick a site: the other sites form the reservoir at temperature T

This site contributes on average

$$S_1 = -k\langle \ln P_i \rangle = -k \sum_i P_i \ln P_i$$
 to the total entropy:

$$S = NS_1$$

Entropy of Two State System
